0004 LARYNGOSCOPE KIT - Kit with two stainless steel handles (to fit blade sizes) and 8 stainless steel blades, bulb in blade. Handle and blades to be made of ASTM (F899-84) standard 300 type stainless steel. 1 each #1, #2, #3 & #4 MacIntosh and 1 each #1, #2, #3 & #4 Miller blades. Blades and handles separate. Fluid-proof carrying case with Velcro or zippered closures (must be spill-proof when closed) and pockets for each blade and handle, must include two spare bulbs for each size and four batteries for each handle. *Kit must be assembled upon delivery.*

SUN8-1050-85 Mid-West Medical Supplies \$ 246.50

0005 LARYNGOSCOPE BLADE (VIEWMAX I.L.S.) - Viewmax® I.L.S. adult laryngoscope blade that allows visualization of the vocal cords in even the most difficult cases. Designed by an anesthesiologist to function like a standard laryngoscope, Viewmax® I.L.S. does not require special training. The blade allows intubation whether you are faced with a Mallampati Grade I or IV airway. Patented lens systems refracts the image approximately 20° from system to provide visual horizontal, allowing visualization of even the most anterior larynx. The exclusive lens system to provide visual confirmation of endotracheal intubation by allowing a clear view of the vocal cords even as the tube passes through. Integrated Light Source (ILS) Technology bundles all the Fiber Optic Components into the blade allowing use of standard handles with Fiber Optic functionality. **Southeastern RU135010 Rusch Viewmax I.L.S®, no substitution.**

0007 LARYNGOSCOPE HANDLE- Pediatric size, no batteries.

Henry Schein Matrx Medical \$ 9.45

0010 ENDOTRACHEAL TUBE PLACEMENT DETECTOR - A very simple tool that uses the anatomical difference between the oesophagus and trachea as its working principle. If there is negative pressure, you are in the oesophagus; if you can aspirate air, you are in the trachea. If the tube is in the soft unsupported oesophagus, the walls will collapse around the end of the endotracheal tube, creating negative pressure if you attempt to aspirate air. If the tube is in the rigid trachea, air can easily be aspirated. Instant feedback - no need for initial ventilation through the tube to obtain CO2 detection. And since no initial ventilation is needed, potential stomach inflation is eliminated. No expiry date, making them easy to handle and store. The bulb can illuminate in the dark, making it the ideal choice for EMS services. *Ambu Tubecek (Bulb Version) or equivalent.*

065-000172002 **Bound Tree** **\$ 1.73**

0011 ET TUBE HOLDER – Device designed to secure an ET tube in place after insertion in the trachea that has comfortable open cell foam padded backing, eliminates the need for tape, has a quick connect ratchet system for easy use with a non-latex strap with a strap inducer. *The Ambu ET Tube Holder or equivalent.*

022640 **Bound Tree** **\$ 2.58**

0012 COMBITUBE - A unique double lumen airway designed for emergency or difficult intubation providing sufficient ventilation whether the airway is placed in the esophagus or into the trachea. Effective for use in patients over 5 feet tall. Kit to include syringes and suction catheters. Single patient use, packaged non-sterile. *Combitube Roll Up Kit, no substitution.*

Henry Schein Matrx Medical **\$ 39.22**

0013 KING LT-D AIRWAY KIT (Size 3) - Supraglottic airway kit, LT-D, yellow, size 3, adult 4-5 ft, tube, 80 cc syringe, lube jelly packet, 1 in. clear tape, designed for positive pressure ventilation without gastric insufflation, easy insertion, with minimal movement of the head, self guiding airway, visual gauge of placement. *KING LT-D AIRWAY KIT (Size 3), no substitution.*

477-KLTD213EA **Bound Tree** **\$ 33.77**

0014 KING LT-D AIRWAY KIT (Size 4) - Supraglottic airway kit, LT-D, red, size 4, adult 5-6 ft, tube, 80 cc syringe, lube jelly packet, 1 in. clear tape, designed for positive pressure ventilation without gastric insufflation, easy insertion, with minimal movement of the head, self guiding airway, visual gauge of placement. *KING LT-D AIRWAY KIT (Size 4), no substitution.*

0015 KING LT-D AIRWAY KIT (Size 5) - Supraglottic airway kit, LT-D, purple, size 5, adult 6 ft and up, tube, 80 cc syringe, lube jelly packet, 1 in. clear tape, designed for positive pressure ventilation without gastric insufflation, easy insertion, with minimal movement of the head, self guiding airway, visual gauge of placement. ***KING LT-D AIRWAY KIT (Size 5), no substitution.***

477-KLTD213EA Bound Tree \$ 33.77

0016 KING LTS-D AIRWAY (Size 3) - Supraglottic airway kit, KING LTS-D, yellow, size 3, adult 4-5ft, double lumen tube allows up to 18 Fr gastric tube, 80 cc syringe, lubricant and instructions Designed for positive pressure ventilation over 30cm H2O and spontaneously breathing patients. Offers the unique ability to pass a gastric tube through a second channel of the airway and into the esophagus and stomach. The anatomically shaped distal tip and cuff assist in the airway's passage behind the larynx and into the normally collapsed esophagus. The second lumen, which is open at the distal tip of the tube provides passage of gastric tube up to 18 Fr, channel for regurgitation, and a vent for gastric pressure and stomach decompression. Has smaller, softer tip and new tapered ramp design, which provides additional ventilation outlets. Ramp located at the proximal eye reduces the need to withdraw the tube when using a tube exchanger or fiberoptics. ***King LTS-D Airway Kit (Size 3), no substitution.***

0040 INTRAOSSEOUS NEEDLE INSERTION DEVICE – EZ-IO DRIVER DEVICE - The EZ-IO® product system by Vidacare® consists of a small battery-powered device and two beveled, hollow drill-tipped needles that were specifically designed to provide safe, controlled vascular access via the intraosseous (IO) route to patients of all ages in emergent situations when vascular access is challenging or impossible. The two needles apply to patients of the weight ranges 3 – 39 kg and 40 kg or greater. The EZ-IO® product system creates a stable port into the intraosseous space accessing the central vascular system within seconds, causing minimal trauma to the patient. The greater than 40 kg needle was specially designed with a beveled drill tip to quickly and easily penetrate through the hard exterior of adult bones while the 3 – 39 kg needle is shorter in length permitting easy access through the softer bones of pediatric patients.

EZ-IO Power Driver – Lithium Sealed Battery (Reusable)

Power Sealed lithium (no battery change required)

Dimensions 14 cm X 9 cm X 5 cm (5.5 in X 3.5 in X 2 in)

Weight 455 grams with lithium (16.05 ounces)

0052 PRESSURE INFUSER - For administration of 1000 ml fluids, see-thru vinyl front, pressure pop-off valve and audible signal when inflation level reaches 300 mmHg. *Matrx DC 18565G-02 or equivalent.*

EDI-3258 Quad-Med \$ 7.56

0053 IV FLUID WARMER – An IV warmer designed to bring one or two intravenous bags up to body temperature and hold them at that temperature so long as power is applied. The IV warmer is to be insulated so that it will keep the bags close to the starting temperature for extended periods of time. Typically, without power, the IV Warmer should lose only 1 degree F in ten minutes. The bag is to allow the user to dispense fluids without removing the IV bag from the IV warmer. The outer covering and insulation are to be fire-retardant. For further safety, the IV warmer is to have a protective sensor to prevent thermal runaway and a fuse to protect against electrical failure.

Features: Insulated so that it will keep the bags close to the starting temperature for extended periods of time; dispense IV fluids directly from bag ; hooks on the inside of the bag, allow IV bags to hang; fused for short-circuit protection, 12 volt power cord to be included. *CFE Medical Products IV Warmer or equivalent.*

0146 PAGER - VHF - Pager shall be capable of either selective code address or monitor mode reception on any assigned frequency in the 143-174 MHz band used by BREMSS providers. Pager shall be state of the art employing synthesized alert code and frequency selection. Pager shall be provided Intrinsically safe with rechargeable battery pack, desk charger, clip, and programming of tone codes and frequency as required by user. Weight - no more than 7.1 Ounces. Dimensions - no larger than 3.52" x 2.4" x 1.5". Warranty period shall be for a period of five years including parts and labor. Programming shall be provided by vendor at no additional charge. *Motorola Minitor V or equivalent.*

Falcon Direct

\$ 449.00

0147 TALK-BACK PAGER - VHF - Combination pager / 5 watt, 512 channel, scanning transceiver unit shall be capable of analog code address or monitor mode reception on any assigned frequency in the 136-174 MHz band used by BREMSS providers. An internal scrambler shall be available for compliance with HIPAA requirements. Up to two address codes shall be provided on any desired frequency including the National Weather Service channel with selective alert coding. Each talk-back pager shall be IP54 dust and water resistant and provided with channel programming to communicate with any EMS participating hospital in the State of Alabama. Talk-back pagers shall be provided with desk charger, pocket clip, high capacity rechargeable battery and antenna. Warranty period shall be for a period of five years including parts and labor. Radio shall be capable of operating in either analog or digital mode on 25 kHz, 12.5, or 6.25 kHz channels for compliance with FCC standards through 2018. Programming shall be provided by vendor at no additional charge. *Icom F3161 or equivalent*

0173 INFANT AND ADULT/CHILD PROFESSIONAL TRAINING MANIKINS COMBO PACK - Portable. Durable. Affordable. Specifically designed for CPR and AED training with the anatomical features identified by the American Heart Association as desirable for instruction. These affordable manikins enable instructors to deliver hands-on, one-student-to-one-manikin training in CPR, AED use, and the Heimlich maneuver. Made to last, they are tested to withstand the equivalent of 10,000 student usages. Manikins feature proper head tilt/chin lift to open the airway, visible chest rise, anatomical landmarks, and an audible compression clicker (adult/child only) to ensure proper technique. All manikins are lightweight, portable, and require minimal cleaning when used with single-use face-shield lung bags. Tough yet soft pliable foam construction is finished with a resilient DuraCoat(TM) smooth-skin layer for realistic feel and long life. Available in the three most common combinations to facilitate one-to-one instruction. Includes 2 blue Infant and 5 blue Adult/Child Training Manikins, 18 lb. Each set is packaged in a blue nylon carrying case with 70 face shield lung bags. Includes a one-year warranty. **Must include soft carrying pack, 30 Adult/Child Combo Face Shield Lung Bags and directions for use. CPR Prompt TPAK 700 or equivalent**

EMI-6164 Quad-Med \$ 387.50

0174 ARM/HAND IV TRAINING MODEL - A realistic IV training model that permits access to the back of the hand (dorsum) and the upper arm (antecubital fossa). The model must allow the hand to be rotated 180 degrees to obtain optimum hand position. The model must contain replaceable pads for antecubital fossa and dorsum IV catheterizations. The replaceable pads must have prefilled, pressurized veins which reseal even with repeated access to the same region. Infiltration and needle flashback must appear immediately. The pad system must be easily replaced and the simulated blood within the vein must be able to be refilled by simple injection. The pad system must have realistic anatomical landmarks with accurate skin and vein feel and appearance. The pad system must be easily cleaned by simply wiping off excess simulated blood or quickly rinsing the affected area in warm water. The model must accommodate all the commonly used IV catheter sizes. The arm model must be packaged in a padded, durable carrying case with two sets of each pad-type and one bottle of replacement blood. ***Laerdal IV Arm and Hand or equivalent.***

653100 Bound Tree \$ 253.25

0175 INTRAOSSEOUS INFUSION SIMULATOR – Simulates a 6 month old infant for training and demonstrating the intraosseous infusion procedure. Intraosseous infusion simulator includes: ten replaceable bone inserts, two sets of replacement leg skins, two white towelettes, syringe with tubing, simulated blood/sealing wax/lubricant/needle, and a hard carrying case. ***Lifeform Intraosseous Infusion Simulator or equivalent.***

EMI-6185 Quad-Med \$ 365.63

0176 AIRWAY MANAGEMENT TRAINER (AMT) - The AMT must be able to provide realistic and complete training in all intubation procedures: tracheal (oral and nasal), pharyngeal (oral and nasal), and esophageal. The AMT must provide realistic anatomy: nostrils, lips, teeth, pharynx (oral and nasal), larynx with glottis opening, vallecula, arytenoids, vocal cords, sub glottis, cricoid ring, trachea (including carina), elastic lungs, esophagus, and stomach. The AMT must provide realistic head positioning: neck flexion, extension and rotation, head lift, and jaw thrust. The AMT must provide realistic checking for proper tube placement with visual inspection of lung expansion during ventilation, auscultation of breath sounds, or by visual examination using a light wand. The AMT must establish and maintain an open airway by head tilt, chin lift, neck lift, and jaw thrust. The AMT should also permit practice in lung ventilation with the use of non-invasive equipment. The AMT must provide the possibilities for practical training in clearing the obstructed airway by suctioning liquid foreign matter from: oral cavity, oro- or naso-pharynx, or oro- or naso-trachea via endotracheal tube. Gastric drainage may also be practiced. The AMT must be easy to clean between students when mouth-to-mouth rescue breathing is part of the training procedures, and after course session when gastric regurgitation is simulated. The AMT will come complete with a sturdy carrying case, directions for use, sanitation kit, and lubrication spray. ***Laerdal Adult Intubation Manikin , no substitution.***

0216 CASUALTY SIMULATION KIT – A full line kit to create 70 individual wounds, plus make to create realism in training. Moulage movie DVD to explain the use and application of every portion of the Simulaids Casualty Simulation Kit by Simulaids or equivalent to be included.

Contents:

- Stick-on Wounds
- Eyeball
- Foreign body protrusion
- Eviscerated intestines
- Large laceration 5 cm
- Medium laceration 3 cm
- Small laceration 1 cm
- Compound fractured tibia
- Compound fractured humerus
- Compound fractured femur
- Small sepsis wound
- Large sepsis wound
- Avulsion 3 x 5 cm
- Major avulsion 8 x 5 cm
- Crushed foot
- 2nd degree burn
- 1st, 2nd, & 3rd degree burn
- Small flesh wound
- Large fracture
- Jaw wound
- Small fracture
- Perforated wound
- Bleeding strap on wounds -- complete with blood reservoir bags and pumps
- Crushed foot
- Impalement lower leg
- Broken clavicle
- Compound fracture of Humerous
- Compound fracture of Tibia
- Laceration of forearm
- Projectile entry

Makeup Accessories

- Atomizer
- Body adhesive
- Cold cream
- Cotton balls
- Glycerin
- Mineral oil
- Mirror
- Pallet
- Petroleum jelly

- Plexiglas pack
- Q-tips
- Scissors
- Spatulas
- Sponges
- Tape
- Pocket pak tissues
- Tongue depressors
- Charcoal
- Fake dirt
- Liners: black, white, brown, red, flesh, blue, and yellow
- Latex
- Simulation wax
- Plasteline: dark, white
- Methyl cellulose
- Blood powder
- Coagulant blood

0221 PORTABLE VENTILATOR - a simple safe, portable ventilator packaged into a lightweight, palm-sized unit. rapid setup, ease of use, and key clinical features make the vr1 ideal for managing airway emergencies wherever they occur: in transport situations, industrial or commercial settings, hospitals or remote locations. MRI compatible. Optional peep capability. features linked manual controls: manual button on top of unit and lever on bottom of unit that moves in any direction allowing flexibility in all situations, tidal volume/frequency control: interdependent single control enables quick setup for patient requirements, patient valve: removable and autoclavable, relief valve: set at 40cm h2o with loud and distinctive alarm to alert operator of excess pressure, gas supply input: 40-150 psi. **VR1 PNEUPAC VENTILATOR, no exceptions.**

84303 Moore Medical \$ 1692.35

0222 PORTABLE VENTILATOR - a powerful and compact gas powered ventilator which meets JAMA guidelines for adult, child, and infant ventilation during cpr. The frequency control varies the breathing rate from 8 to 40 per minute and is color coded with the tidal volume control which gives volumes from 1300ml to 70ml. the parapac is equipped with a 2 point blender of 100% o2 or an air mix of 50% o2. it also has adjustable relief pressure of 20 to 80 cm h2o with optional audible alarm. if the patient makes any spontaneous breathing effort, oxygen is automatically taken from the integral demand valve. if this breathing is inadequate for the patient, then the ventilator still delivers minimum ventilation but delays each breath appropriately to synchronize with the patient's breathing effort. if the patient breaths adequately, then the ventilator becomes inhibited and oxygen is supplied by the demand valve only. **VENTILATOR AUTOMATIC WITH REGULATOR paraPAC MEDIC - WITHOUT ALARM, no exceptions.**

84323 Moore Medical \$ 3131.90

0223 PORTABLE VENTILATOR - a powerful and compact gas powered ventilator which meets jama guidelines for adult, child, and infant ventilation during cpr. the frequency control varies the breathing rate from 8 to 40 per minute and is color coded with the tidal volume control which gives volumes from 1300ml to 70ml. the parapac is equipped with a 2 point blender of 100% o2 or an air mix of 50% o2. it also has adjustable relief pressure of 20 to 80 cm h2o with optional audible alarm. if the patient makes any spontaneous breathing effort, oxygen is automatically taken from the integral demand valve. if this breathing is inadequate for the patient, then the ventilator still delivers minimum ventilation but delays each breath appropriately to synchronize with the patient's breathing effort. if the patient breaths adequately, then the ventilator becomes inhibited and oxygen is supplied by the demand valve only. **PARAPAC VENTILATOR W/ ALARMS, no exceptions.**

0224 MCI BAG - contains all the equipment necessary to respond rapidly, and provide effective management during a mass casualty event. with this system, a first-responder can establish a complete on-scene medical command post in any location. it is ideal for deployment at sporting events, malls, conference centers, concerts, and other public venues. includes 4 smart triage pac's, 1 smart commander, 3 clear plastic pouches, carry bag and external label. complete solution for mci response and management, durable carry bag with backpack straps for easy transport, space for additional mci supplies and equipment, one smart mci bag provides triage capabilities for up to 80 casualties. **SMART MCI BAG W/EMS FLOW CHARTS TRIAGE SYSTEM or equivalent.**

73245 Bound Tree \$ 785.00

0225 CHILLCORE Case - The chillcore™ case enables therapeutic hypothermic induction to begin immediately on-scene. The chillcore™ case keeps iv solutions at desired temperature (as low as 20° f) even in periods of extreme heat.* The chillcore™ case will comfortably store up to 2 liters of iv solution as well as rsi and other vital cardiac medications that require refrigeration. The chillcore™ case automatically switches to battery power when removed from the vehicle and will operate on its own internal batteries for up to 90 minutes. A built in smart sensor "kicks up" the cooling power during extreme conditions.
